- Digitizing of all quality zones by an employee using a digitizer or loupe marked (e.g. using chalk) are recorded by the camera during the scanning process.

## pre-selectEXPERT: Classify your leather into categories.

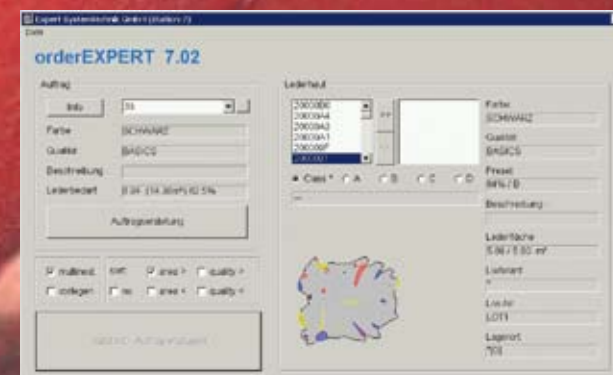

- Grading of leather hides automatically in a few seconds.
- Set the parameter for the internal classification of your leather.
- Identify your leather precisely and very easily.
- Choose your leather for the creation of orders from up to three categories.
- Be certain in the global administration of your different production lines of business.

scanning

## orderEXPERT: Organise your workflow.

- Preparation of nesting process at a separate work station.
- Creation of nesting orders by compiling hides and patterns for an order.
- Enables combination of several customer orders to one production order.
- Provision of finished order to the nesting work station.

## nestEXPERT multinest: Your maximum yield by nesting hides automatically.

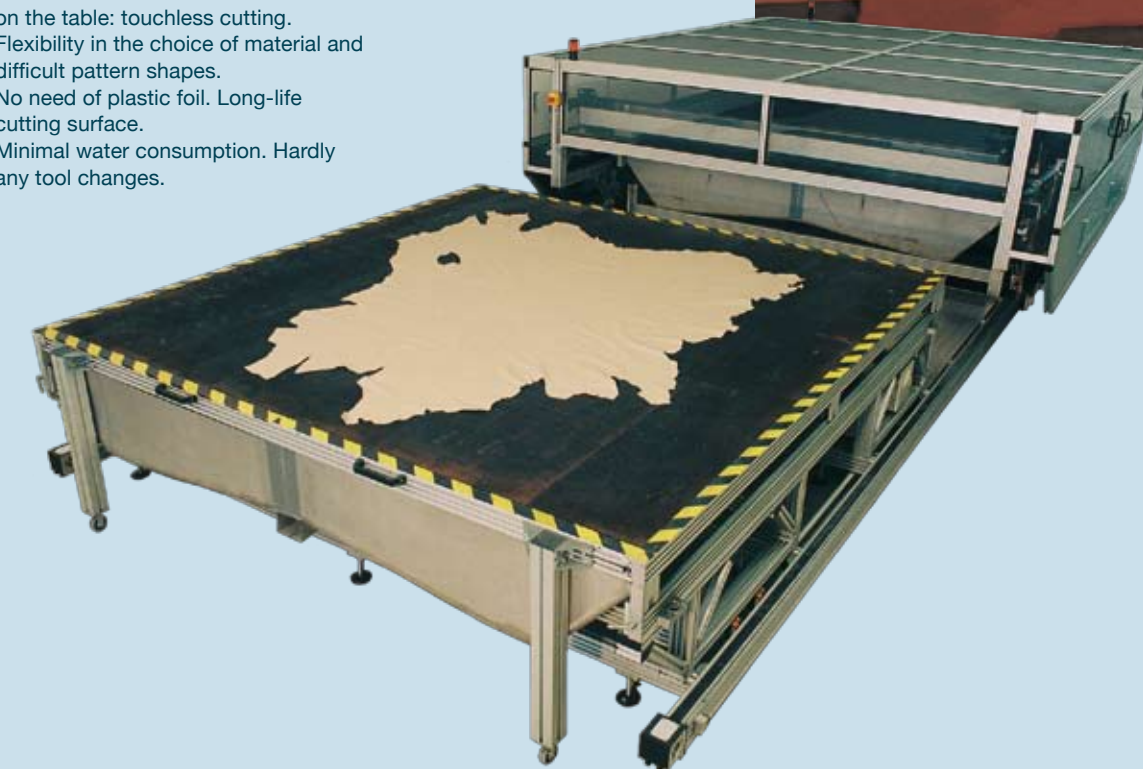

- Increase your efficiency and productivity automatically.
- Discover the yield of all hides in the order before cutting.
- Increase your yield by using a nesting network.
- Combine automatic and interactive optimization.
- Order-related nesting optimized to avoid waste.
- Mixing of good and inferior hides for an order.

nesting

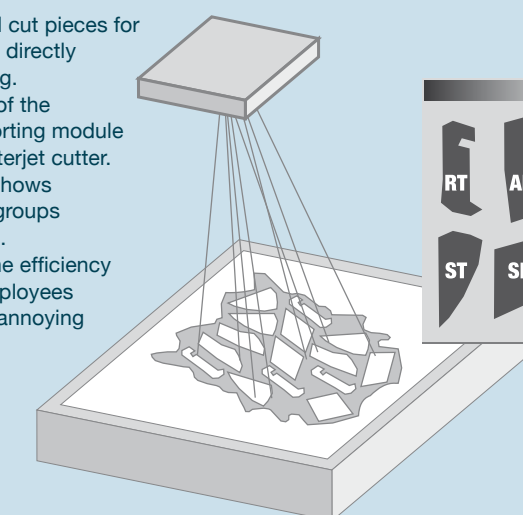

## cutEXPERT doublejet: Born to be faster than other cutters.

- High speed and constant precision when cutting with waterjet technology.
- No mechanical movement of the material on the table: touchless cutting.
- Flexibility in the choice of material and difficult pattern shapes.
- No need of plastic foil. Long-life cutting surface.
- Minimal water consumption. Hardly any tool changes.

## With pick-upEXPERT you sort all of your cut pieces for the next step directly after cutting.

- You sort all cut pieces for the sewing directly after cutting.
- Make use of the optional sorting module at your waterjet cutter.
- The laser shows individual groups of patterns.
- Increase the efficiency of your employees and avoid annoying re-sorting.

cutting

## Cut several material sheets at the same time on one cutting table with skinEXPERT.

- Cut several small hides simultaneously on only one table.
- Make use of this option for cutting small split- or bycast leather hides.
- Use skinEXPERT for cutting your samples on carton.
- Benefit from all advantages of the preceding Expert software versions.
