

# Solutions for cutting and more Precision and speed

#### scan **expert** automatic

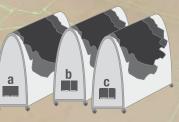

- highest technical level Inspect your incoming leather hides and administrate your leather stock
- •

- Make your leather data available across your global enterprise •
- Digitizing of all quality zones with a digitizing cursor Previously marked flaws (e.g. with chalk) are automatically identified by the camera during the

pre-select expert: Classify your leather into categories

- Grading of leather hides automatically in a few seconds
- Set the parameters for the internal classification of your leather
- Identify your leather precisely and very easily
- Choose your leather for the creation of orders from
  - up to three categories Transparent overview of qualified
  - leather inventory

scanning

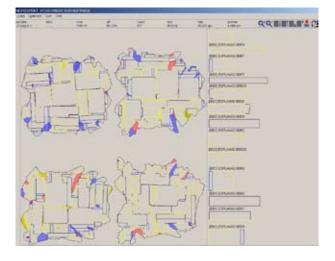

## order **expert**: Organise your workflow

- Preparation of nesting process at a separate work station
- Creation of nesting orders by compiling hides and patterns for an order
- Enables combination of several customer orders to one production order
- Provision of finished order to the nesting work station

#### order expert Afric sei Perie BCHONE Bestrebug Lesrenzer Bild (Miller) (DSh Arbigerithing) Pindnez of Pinest Cally ( Dentrebug Dentreb

## nest **expert** multinest: Your maximum yield by nesting hides automatically

- Increase your efficiency and productivity automatically
- Discover the yield of all hides in the order before cutting
- Increase your yield by using a nesting network
- Combine automatic and interactive optimization
- Order-related nesting optimized to avoid waste
  Mixing of good and inferior hides for an order

### cut **expert** doublejet: Born to be faster than other cutters

- Waterjet cutting with high speed and
- No mechanical movement of the material on the table: Touchless cutting Flexibility in the choice of material and
- difficult pattern shapes

- Long-life cutting surface Minimal water consumption Hardly any tool changes

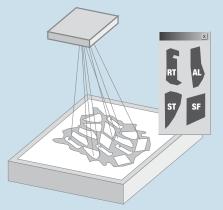

With pick-up **expert** you sort all of your cut pieces for the next step directly after cutting

- You sort all cut pieces for the sewing directly after cutting
- Make use of the optional sorting module at your waterjet cutter
- The laser shows individual groups of patterns
- Increase the efficiency of your employees and avoid annoying re-sorting

Cut several material sheets at the same time on one cutting table with skin **expert** 

- Cut several small hides simultaneously on only one table
- Make use of this option for cutting small split- or bycast leather hides
- Use skin **expert** for cutting your samples on carton
- Benefit from all advantages of the preceeding **expert** software versions

## cutting

### Your pattern manager: flexible and simple with pattern expert

- Optimize the data capture of your patterns
- Benefit from the clearly defined model manager
- Be flexible with any modification of your patterns
- Import your data from other CAD systems without complications
- Use your model data across many industries
- Create groups according to your sewing plan

## data **expert**: Your overview of production and management of leather hide stock

- Use the detailed production overview when cutting leather hides
- Have an overview of the daily efficiency of your production process
- Monitor historic leather consumption figures
- Use the complete database for calculations in your purchase department
- Administrate your leather stock and compare your suppliers
