## scan **expert** software

- Control your incoming leather and administrate your leather stock
- Your quality assurance starts with the scanning of your leather
- Optimize the yield of your hides
- Reduce your claims
- Make your leather data available across your global enterprise

## pre-select **expert**: Classify your leather into categories

- Classify your assorted leather hides automatically in a few seconds
- Set the parameter for the internal classification of your leather
- Identify your leather precisely and very easily
- Choose your leather for the creation of orders from up to three categories
- Be certain in the global administration of your different production lines of business

## scan **expert** automatic

- Automatic identification of imperfection on hides
- Automatic identification of quality zones
- considerably increased productivity through automatic scanning
- Hide receipt control without any additional aids like chalk, adhesive tape, symbols or colouring pens
- Hides cannot shift during this process due to excellent vacuum system

- Ergonomic handling
- Individual quality setting to your specific needs
- Automatic documentation of all data for each and every hide
