

Optimize the yield
of your leather hides

The world's first Automatic Flaw Detection

scan **expert** automatic+

ENGLISH

scan **expert** automatic⁺

- World's first automatic and colour-independent error detection system
- Even for finished leather, wet-blue and crust
- Analysis of defect locations on a reconstructed surface
- Higher speed using modern algorithms
- Increased security in incoming goods inspection
- Secure fixation of the hides during the scanning process
- Independence from complexity of hides and different natural defects

Your ideas. Our solutions.

**Get informed about
the advantages.**

Customized solutions, modular technology, agile working practices

Every company and every manufacturing process is unique. Our appreciation of this is found in our drive to develop a simple and practical solution for every technical challenge. For more than 25 years we have been designing and developing innovative automated CAD/CAM controlled cutting systems using waterjet and CNC technology – always implemented in combination with the most up-to-date digital technology, our in-house software.

we think in **cutting** solutions.
